Dean's Radar

1.0

I want a mobile app so that I can see/view projects/events occurring in all 9 of the departments in T&C.

Dean

Android Phone App built with Cordova

Events

click event
get a detailed view

notification
get notified of new events

unseen events are a different color

add events to calendar

sync app with notifications

Chair Input

2.0

I want to be able to let the Dean know of events/projects that we are doing in our department.
